Be Seen at UC San Francisco

UCSF Digital Signage Network

Let us post your content or help install your own sign

Campus Life Services, Business & Technology Solutions supports a growing network of digital signs for campus organizations to broadcast news and information throughout UCSF or target specific campus locations.

Ask us about posting your content or how we can help you install and manage a sign of your own. We can connect you to our robust and secure signage network. Let us manage the software, server, and end points to support your signage needs.

For more information, contact:
